Mr. Woodard,

Your interesting telephone conversation concerning your proposed effort to penetrate the inner Realms is hopefully successful.

The enclosed photocopy is from an old Comrade, I received it after the war (The Original letter) To clarify, The U 209 was assigned one of the strangest missions of the entire War. She was directed to proceed in an attempt to clarify the actual existence of Inner Earth! Furnished with charts and directions by Dr. Karl Haushofer, The U 209 was to proceed to a certain Latitude and Longitude, there to enter a giant undersea cavern with a current of about 6 Knots, there to let the U Boote be carried downward and onward.

The U 209 was commanded By Kptlnt. Heinrich Brodda, a most veteran Officer of fidelity. You see, there were many in the Third Reich that believed this theory of an existing inner Realm.

Among those aboard the U 209 was an old friend, one Karl Unger, I received his communication some time after the War had ended, I know it is genuine, as I knew his handwriting very well.

The approximate English Translation of Karl's Letter is as follows:

Dear Old Comrade!

This news will be a surprise for you. The U 209 Unterseeboot made it!!! The Earth is Hollow!! Dr. Haushofer and Hess were right. The whole crew is well, but they can not come back, we are no prisoners. I am sure, this news will reach you, it is the last connection with the U Boote 209. We will meet again Comrade. I am worried for everyone who has to spend his life on the Surface of the Earth since the Führer is gone. God Bless our Germany always,

With Hearty Greetings

So, you have now a copy of the document as promised.

If you write further, I shall be away from 15 Marz until 25 Marz.
